THIS PRESS RELEASE WAS ORIGINALLY RELEASED IN SWEDISH FOR THE SWEDISH MARKET AND HAS LATER BEEN TRANSLATED TO ENGLISH FOR GENERAL AWARENESS ON THE GLOBAL MARKET

## First day of trading in SenzaGen shares on Nasdaq First North in Stockholm

Trading in SenzaGen AB's shares was launched today on Nasdaq First North in Stockholm under the short name "SENZA" with ISIN code SE SE0010219626.

SenzaGen AB ("SenzaGen" or "the Company") announces that trading in the Company's shares began today on Nasdaq First North. As previously announced, the SenzaGen share offering was heavily oversubscribed prior to the listing.

*"We are delighted to be listed on Nasdaq First North and we are proud of the support we have received from investors who have put their trust in us as they join us on our journey as a listed company. The listing and the capital injection will accelerate the development of SenzaGen so that we can offer society a new global industry standard of animal-free testing,"* says SenzaGen CEO Anki Malmberg Hager.

### About GARD

**GARD™** is a group of tests for assessing chemical skin sensitizers. The tests make use of genetic biomarkers for more than 200 genes which cover the entire immune reaction and are relevant to predicting the risk of hypersensitivity. The tests have up to 90% reliability. This compares with the current predominant test method, experiments on mice, which has an accuracy of 70-75%. SenzaGen's tests are also capable of measuring the potency of a substance's allergenic properties. Consequently, **GARD™** tests provide a much more comprehensive basis for determining whether a substance should be classified as an allergen than current testing methods.

### About SenzaGen

SenzaGen makes it possible to replace animal experiments with in vitro genetic testing to determine the allergenicity of the chemicals we come into contact with in our daily lives, such as for example in cosmetics, pharmaceuticals, food products and dyes. The company's patented tests are the most reliable on the market and provide more information than traditional evaluation methods. We ourselves sell the tests in Sweden and the USA, and we sell through partners in several other countries. Over the next few years the company will expand geographically, make alliances with more distribution partners and launch further unique tests. SenzaGen has its headquarters in Lund in Sweden and a subsidiary in San Francisco, USA. For more information visit [www.senzagen.com](http://www.senzagen.com)
